Presidents Message

Dear Members,

As we move into the heart of summer, I wanted to remind everyone that we will not have a technical meeting for the month of July. We hope you take this opportunity to enjoy time with your family and friends during this well-deserved break.

Our technical meetings will resume in August, and we have an exciting lineup planned for the rest of the year. I encourage you to check out our meetings page to see all the upcoming meetings for the remainder of 2024.

I would also like to extend my heartfelt thanks to Chris Phillips and all our local representatives for supporting and hosting a fantastic Top Golf Tournament last month. Your dedication and hard work made it a memorable event for everyone involved.

I am truly honored to be the president of such a great and actively participating chapter. Thank you all for your continued support and enthusiasm.

Have a wonderful summer, and we look forward to seeing you in August!

Warm regards,

Greg Rodriguez
ASPE President

Serving the Engineering
Community

July is here, and I'm excited for a summer break to enjoy some quality time with family and vacations. Just a reminder, we won't be having a Technical meeting this month. We'll kick things back off in August with Warren Hill from ECCO, who will introduce us to gas regulators. His presentation will cover the basics of using and installing gas regulators.

On another note, we will begin taking registrations for our November Tech Seminar and Product Show. You can register online for the seminar and show. Vendors will be sent an email soon regarding booth registrations.

Have a happy 4th of July, and I look forward to seeing you all next month!
Warm regards,

Zed Hernandez
Vice President Technical

Annual Top Golf Event: A Swinging Success!

A big thank you to everyone who attended our Annual Top Golf event! It was a fantastic time filled with networking, laughter, and friendly competition. Your participation made it a memorable evening, and we appreciate your continued support.

Looking Ahead: Technical Session in October 2024

Mark your calendars for our upcoming Technical Session scheduled for October 2024 in Austin, Texas. This event promises a wealth of learning opportunities and enjoyable experiences. Stay tuned for more details, and prepare yourself for an enriching and fun-filled event.

Get Ready to Make an Escape!

We are excited to announce a special event for our Young Professionals and Women of ASPE. Join us at "The Escape Game San Antonio" on July 25 at 5:30 PM. This thrilling adventure is sponsored by Zed with Champions and will be held at 5822 Worth Pkwy, Suite 101.

Don't miss out on this exciting opportunity! Advanced registration is available on the ASPE central website. Sign up today and get ready to escape the ordinary!

We look forward to seeing you at these events and continuing to build our vibrant community of young professionals in the plumbing engineering industry.

For more information and updates, visit the ASPE central website.

Celebrating Women in the Construction Industry: Spotlight on Wendy Junod

Highlighting the achievements and contributions of women in our industry is not only important but also helps inspire future generations. Celebrating their accomplishments as women paving their own way in our industry and helping better our communities' growth is essential to opening the door to more diversified groups within the Construction Industry. This month, we feature one of our very own Women Plumbing Designers, Wendy Junod, from DBR Engineering.

A Journey into Plumbing Engineering

Wendy Junod's journey in the plumbing engineering field is a testament to resilience and adaptability. Starting her career in drafting in 2001, Wendy transitioned to plumbing design in 2017. "It was sort of accidental," she reflects. After years of drafting in AutoCAD for an engineer, she continued as a freelance subcontractor when the business closed. A fortuitous call from a contact led her to a position as a plumbing designer, where she learned REVIT on the job. "The rest is history," Wendy says with a smile.

Unique Insights and Skills

As a woman in a predominantly male industry, Wendy brings unique insights and skills to her role. "Women are notoriously adept at multitasking and attention to detail," she notes. These skills are invaluable in engineering, where precision and the ability to manage multiple tasks simultaneously are critical.

Overcoming Challenges

Wendy acknowledges that she has been fortunate to be valued for her knowledge and ability. However, she has faced challenges, particularly in keeping up with the ever-changing landscape of IT. This adaptability and willingness to learn are crucial traits for success in any technical field.

The Joys of Engineering

When asked about what she loves most about her role, Wendy emphasizes the collaborative aspect. "Working as part of a team and figuring out how to meet the client's desires in the most practical way" is what she finds most fulfilling. This team-oriented approach not only enhances project outcomes but also fosters a supportive work environment.

Advice for Aspiring Women Engineers

Wendy offers practical advice for women considering a career in the plumbing industry: "The industry is pretty no-nonsense, so save the drama for your mama, haha." She adds, "Realistically, the only limitation you have is what you put on yourself." This straightforward advice highlights the importance of resilience, self-confidence, and a pragmatic approach to one's career.

Inspiring Future Generations

Wendy Junod's story is an inspiring example of how women can thrive in the construction industry. Her journey underscores the importance of recognizing and celebrating the contributions of women, which in turn inspires future generations to pursue careers in this field. By highlighting the achievements of women like Wendy, we pave the way for a more diverse and inclusive industry, enriching our communities and enhancing our growth.

Thank you,

Hayley

Women
of ASPE®

What is ASPE?

The **AMERICAN SOCIETY OF PLUMBING ENGINEERS** (ASPE) is the only organization dedicated to promoting the plumbing engineering profession to both enhance career opportunities for our members and ensure the health, safety, and well-being of the public through the design of safe plumbing, drinking water, and sanitation systems.

WHAT WE DO

Provide continuing professional education programs

Publish design manuals, tools, and standards

Host conferences, tradeshow, and networking events

Certify professionals skilled in plumbing system design

Promote safe and sustainable water and sanitation systems

Represent the industry in local and national government

Help develop safe plumbing and building codes and standards

OUR MEMBERS

Our members are individuals working in various professions related to plumbing system design.

← What Is Plumbing Engineering?

Plumbing engineering is a vital part of the design/build construction process. Plumbing engineers use the principles of fluid flow with engineering calculations to design plumbing systems that transport fluids such as water, wastewater, natural gas, and rainwater throughout buildings.

WHAT IS A Plumbing Engineer?

PLUMBING ENGINEERS are a vital part of design/build construction teams for residential, commercial, and industrial facilities. They interact with other construction trades to provide building owners with efficient, functional, and sustainable plumbing systems that protect the health, welfare, and safety of the public and prevent environmental contamination.

WHAT DO PLUMBING ENGINEERS DO?

PLUMBING ENGINEERS use the principles of fluid flow along with engineering calculations to design plumbing systems that transport fluids and gases throughout buildings. Those systems include:

$$S = \frac{\text{rpm}\sqrt{Q}}{\text{NPSH}^{0.75}}$$
$$\times 2.31 - h_f, L_H + \frac{(P_B - V_P)}{\text{Specific gravity}}$$

Domestic water systems

Wastewater

Fuel gas

Medical gas & vacuum

Compressed air

High-purity water

Fire suppression

Chemical waste

Rain & stormwater systems

Venting

Site & building drainage

Water efficiency

WHAT DOES THE PROFESSION ENTAIL?

"The old adage that 'anyone can do plumbing' does not hold water anymore. A diversified and accomplished plumbing engineer is a valuable commodity in the design/build market."

PLUMBING ENGINEERS are highly skilled individuals involved in many different aspects of the design/build process, including:

PLUMBING SYSTEM DESIGN	COMMISSIONING
PROJECT MANAGEMENT	CODE & STANDARD EXPERTISE
CONSTRUCTION ADMINISTRATION	FORENSIC & SUBSURFACE SYSTEM EVALUATION
BUILDING INFORMATION MODELING (REVIT)	COST ESTIMATION
PRODUCT & SYSTEM SPECIFICATION	PROBLEM SOLVING

PROTECTING PEOPLE & THE ENVIRONMENT

PLUMBING ENGINEERS help eliminate many of the threats that sicken people and harm the environment on a global scale by:

Delivering safe drinking water & sanitation systems

Combating groundwater contamination & depletion

Preventing waterborne diseases

"Through their designs, plumbing engineers affect every life."

THEY DO THIS USING THEIR KNOWLEDGE OF:

HOW TO LEARN MORE

The American Society of Plumbing Engineers (ASPE) is the only association dedicated to promoting the plumbing engineering profession and helping plumbing engineers advance in their careers. Our members have a wealth of knowledge and experience and are ready to help others learn more about the industry.

To discover ASPE and find local contacts, visit:

aspe.org

Connect with Us

Making the Most of Your Membership

MEMBER BENEFIT TIP #1 - BUILD A KILLER NETWORK

One of ASPE's greatest benefits is its members. Everyone is busy at home and at work, but members who attend Chapter meetings, [Conventions & Expositions, and Symposiums](#) are more likely to build a killer contact list. Our members are eager to help you in your next plumbing engineering problem, which undoubtedly will make you more competitive in the workforce.

Whether you are in sales or engineering, you sell yourself every day. ASPE has many networking opportunities for you to meet professionals who possess the skills and training necessary to help you out of a tight spot or put you in touch with someone who can help you. If you are outside your comfort zone, ask your Chapter Board to make the introductions. Exchange business cards and remember to follow up with a brief conversation or email thanking them for their time. Before you know it, you will be a pro in engaging other members, which will lead to career growth and prosperity. If you are not able to attend a Chapter meeting, [ASPE Connect](#) offers you a way to build your network online.

MEMBER BENEFIT TIP #2 - ASK A MEMBER FOR HELP

Being a member in ASPE enables you to call upon a friend for help. Your Chapter Officers know who does what. Call your [Chapter leaders](#) when you are stumped on the job and ask for help. More times than not, you will find a fellow member who is more than willing and able to assist you with your problem. If they can't help, kick it up to the [Region Director](#), and they will find you the help you need. ASPE members treat other members just like family; it's our single most valuable membership benefit.

MEMBER BENEFIT TIP #3 - BOOST YOUR INDUSTRY VISIBILITY

Demonstrate your abilities to lead and boost your industry visibility by volunteering to join your Chapter Board of Directors or apply to join the [Society Board of Directors](#). Employers, clients, and coworkers respect and look up to ASPE Chapter and Society Officers. Without our leaders, we would not have a Society; it's worth the work.

MEMBER BENEFIT TIP #4 - EXPAND YOUR KNOWLEDGE AND EARN CEUs

ASPE produces webinars for members to expand their knowledge of plumbing systems and design. Members pay about half the price as nonmembers and if the webinar is sponsored, members can participate for free, so this is a great member benefit. Hover over Education & Credentialing in the [aspe.org](#) main menu, and then click on [Webinars and Workshops](#). You can access current webinars as well as every webinar ASPE has ever held. Don't forget to recommend these to your colleagues and clients.

Through our special Read, Learn, Earn series, ASPE also can help you accumulate the CEUs required for maintaining your CPD or CPDT credential or other regulatory agency CEU programs for your Professional Engineer license. Here is how you do it. Go to [aspe.org](#), hover over Education & Credentialing, and in the left column you will see [Read, Learn, Earn](#). Click on it and it will take you to a page with the active materials. This benefit is free to members and \$35 for nonmembers. Download one of the articles, read, learn, and earn your CEUs. When you complete the payment screen, the system guides you through the questions and you can enter your answers directly into the system. (Note that members do NOT need to add a credit card.) Voila! If you get 90% correct, you will receive your 0.1 CEU in the email specified in your account.

MEMBER BENEFIT TIP #5 - TRACK YOUR CEUs

We've seen some extraordinary new things come out of ASPE in the past couple of years, but this benefit is as good as it gets. Did you know that you can track your CEUs in your member area on [aspe.org](#)? Well you can, and here is how:

1. Under Education & Credentialing in the [aspe.org](#) main menu, in the left column click on [Continuing Education](#). You have now entered the ASPE Education website.
2. In the menu click on [My Education](#). (You must be signed in to see My Education.) This takes you to your dashboard.
3. Under My Dashboard, click on Transcript/Achievements.

All of your ASPE-sponsored CEUs will already be populated in this table, but you can also add other CEUs from other sources. Simply click on the link toward the top of the table and the site will direct you to a page to add the session information and to upload a certificate.

This member benefit is invaluable in keeping your CEUs current, and it's only offered to members. Don't get caught empty-handed when the eventual audit for your credential comes around.

MEMBER BENEFIT TIP #6 - MEET POTENTIAL CLIENTS/MEMBERS

If you are an Affiliate member, in sales, who steps up and takes on a membership role, you are in a unique position to promote ASPE and your company. Your leadership role is a valuable way to place yourself in front of prospective clients and members. Talk to your Chapter Board of Directors and see what you can do to promote yourself and ASPE.

MEMBER BENEFIT TIP #7 - LEARN HOW TO MENTOR OTHERS

ASPE has mentor opportunities so you can help foster the career of another member. Opportunities are available for all members. Just click on [Mentoring Program](#) under Membership & Global Community on [aspe.org](#) for more information. Leave your mark on our Society.

MEMBER BENEFIT TIP #8 - ADD LETTERS TO YOUR NAME

We all market ourselves every day with everything we do, and ASPE can help with programs that can add letters to your name: our [Certified in Plumbing Design \(CPD\)](#), [Certified Plumbing Design Technician \(CPDT\)](#), and [Green Plumbing Design \(GPD\)](#) programs. These programs will help others instantly recognize your leadership and expertise in the plumbing design industry.

MEMBER BENEFIT TIP #9 - ACCESS YOUR ASPE ACCOUNT

Accessing your ASPE account has never been easier. Visit [aspe.org](#) and click on the [LOGIN](#) tab in the upper right-hand corner. If you know your username or email address and your password, enter them and you will be done. If you do not know your username and password but know your email address, click on the "Request a New Password" tab. A temporary password will be sent, but be sure to change it when you log in. If you do not know your username, you can try your last name followed by your member number, just the digits. For example: jones12345.

Having trouble logging in to your ASPE account or you can't remember your member number? No worries. Your Chapter Vice President, Membership has a roster with this information. Call or email them and they will be happy to help you access your account.

MEMBER BENEFIT TIP #10 - MEMBERSHIP RENEWAL

ASPE has made it easier than ever to renew your membership. Log in to [aspe.org](#) as you ordinarily do and then to the left of the login button is a green "[Join/Renew](#)" button. Just click and you'll be renewed in no time. **NOTE: If you have lapsed for more than 90 days, your account was purged from the membership database and you will need to reapply for membership.**

MEMBER BENEFIT TIP #11 - SPECIAL-INTEREST GROUPS

[ASPE Young Professionals \(AYP\)](#) is designed for young industry professionals looking to meet with peers to share experiences, exchange ideas about the plumbing design industry, and network with other Chapter members. The focus of AYP is to help young plumbing engineers, design professionals, and practitioners establish contacts and further the mission of the Society. ASPE members 35 years old and younger are all included in this special-interest group.

The core mission of the [Women of ASPE \(WOA\)](#) is to engage, retain, and advance women in the plumbing design industry, through education, leadership development, and networking opportunities. WOA is committed to bringing together women and assisting them to achieve their professional and personal goals.

MEMBER BENEFIT TIP #12 - ASPE TABLES

The [ASPE Plumbing Engineering & Design Handbook of Tables](#) is a tool to help members with pipe sizing, equations, and more. This information is available not only as a book, but it is also available in both the Apple App Store and in the Google Play Store, offering members a portable way to access these valuable tables from their phones. More recently, the tables have become available for download to your Mac or PC. Just visit the [ASPE Bookstore](#) and you can have these tables at your fingertips.

MEMBER BENEFIT TIP #13 - CAREER CENTER

ASPE's Career Center is a valuable tool for ASPE members seeking new jobs or those looking for experienced plumbing engineers to join their team. Just hover over Membership & Global Community in the [aspe.org main menu](#) and click on [Career Center](#) to get started.

ASPE Purpose

The core purpose of the American Society of Plumbing Engineers is to continually enhance and promote the profession of plumbing engineering design while assisting in improving the health, welfare, and safety of the public on a global scale.

CPDT CERTIFIED PLUMBING DESIGN TECHNICIAN®

HOW THE CPDT CREDENTIAL CAN ACCELERATE YOUR CAREER IN PLUMBING ENGINEERING

Due to its niche nature, plumbing engineering offers a long, stable, and profitable career, but breaking into the profession can be challenging if employers aren't aware of your unique skills. That's where the Certified Plumbing Design Technician (CPDT) credential can help. As the only credential

specific to plumbing system designers early in their careers, the CPDT provides immediate recognition of individuals skilled in this trade. That's why Ashley Turlington, CPDT, recommends earning the designation. "Companies seek candidates with credentials

pertinent to their field," she says. "The CPDT can open up a lot of professional opportunities."

DEMONSTRATE YOUR TECHNICAL KNOWLEDGE

Administered by the American Society of Plumbing Engineers (ASPE), the CPDT program provides a standard of professional competence in the practice of plumbing design at the technician level. Employers are assured that designers who have earned the CPDT credential have the requisite knowledge and skills to excel in their company. This is one of the primary reasons individuals pursue the designation. "I earned my CPDT credential to demonstrate my technical knowledge of plumbing, and it has given me better recognition as a well-rounded plumbing designer," says John Lansing, CPDT, LEED Green Associate.

VALIDATION OF YOUR ACCOMPLISHMENTS

Through its rigorous processes, the CPDT program identifies professionals who have demonstrated their expertise and abilities in the field of plumbing design. The certification exam tests an individual's proficiency in skills that employers desire, such as laying out systems, sizing calculations, selecting equipment, and preparing documentation. The test specifications and content reflect the abilities essential to performing at the technician level of a plumbing designer.

The CPDT credential gives you "more respect, validation of your accomplishments, and [subsequently] more compensation," says Justin Wroblewski, CPDT.

IMPROVE YOUR VALUE TO YOUR COMPANY

The CPDT program's recertification requirement means that CPDTs must stay current on new techniques and technologies through continuing education, which is a desirable trait to employers who are looking for an edge in the competitive MEP market. Having CPDTs on their staff showcases a firm's expertise and their commitment to maintaining the highest, most up-to-date design standards.

"My CPDT credential has allowed my company to get better jobs because clients view us as more knowledgeable," Turlington says.

And the benefit is mutual. "Taking the step to improve your value to your company will also benefit your career," says Wroblewski.

HOW TO ACCELERATE YOUR CAREER

The CPDT program is designed for plumbing system designers with less than eight years of professional experience, and the exam is held annually at online testing sites around the world. If you are planning on achieving ASPE's internationally renowned Certified in Plumbing Design (CPD) credential, the CPDT is an excellent starting point.

To learn more and start accelerating your career, visit www.aspe.org/education-credentialing/cpdt/cpdtexam

ASPE Mentoring Program

This program, which is available to all members of the Society, has been designed to connect ASPE members who have a particular skill set (mentor) with individuals (mentee) who are searching to acquire the same skills to develop and make progress toward their personal and professional goals.

Who Is a Mentor?

A mentor is someone who can help the mentee develop skills for success and long-range career planning, is able to be a good listener, is willing to share experiences and views, is willing to commit time and effort, provides an “open door” to questions and problems, points out both strengths and opportunities for improvement, and has a vested interest in the growth and development of their mentee.

Benefits to the mentor:

- Satisfaction in helping someone mature, progress, and achieve goals
- Meeting and sharing experiences with other mentors
- Personal ongoing support to help the mentee succeed
- Personal fulfillment through contribution to the Society and the individual

Who Is a Mentee?

Having a mentor can contribute to a successful and satisfying career. Without a mentor, that learning occurs mostly through trial and error. With a mentor, even experienced professionals can benefit from the experiences and expertise of someone who has withstood the trial and can help the mentee avoid the mistakes. Similarly, those new to the industry will discover that being a mentee shortens the learning curve for acquiring the skills and knowledge most critical to a fruitful career.

Benefits to the mentee:

- Discover new talents about yourself
- Career satisfaction
- Expand your personal network
- Maximize your strengths

Ph: 909-472-4100 | Fax: 909-472-4243
<http://www.iapmort.org>

Report Number: 2536-18001-002 Project No.: 29225
 Report Issued: February 26, 2018.
 Client: Aqua-Rex
 3301 Spring Mountain Road Ste 18
 Las Vegas, NV 89102 Contact: Jonny Seccombe
 Source of Samples: The samples were shipped to IAPMO R&T Lab from Aqua-Rex, and received in good condition on October 11, 2017.
 Date of Testing: October 25, 2017 through December 15, 2017.
 Sample Description: Scale Prevention Device; model: Aqua-Rex WK1-E.
 Scope of Testing: The purpose of the testing is to determine the efficacy of the Scale Prevention Device per section 5 of IAPMO IGC 335-2018, entitled "Rapid Scaling Test for Scale Prevention Devices".

CONCLUSION: **When tested per Section 5 of IAPMO IGC 335-2018, Aqua-Rex WK1-E reduced scaling by 83% when applied to Las Vegas water heated to 180°F.**

Tiny valve-clogging bits of
debris, meet your match.

Introducing Ultima

Failed flush valves waste time, money and water. The Ultima Diaphragm Flush Valve features a self-cleaning wiper spring that clears the refill orifice with every flush, preventing clogs and run-on before they start. It's the very tiny big idea you've been waiting for. After 150 years, American Standard knows what you need in reliable bathroom performance.

MediTrac[®]
Flexible Medical Gas Piping by OmegaFlex[®]

Up to 5x faster installation. 100% more time for patient care.

Rarely does a product come along that lowers costs and risks while adding more time for patient care. MediTrac[®] rolls out these benefits and more with patented, bendable, long-length corrugated copper alloy medical tubing. Up to 70% fewer fittings. Up to 80% less hot work. Up to 5 times faster installation and up to 55% less cost* without closing sections of your facility. Now that's ingenuity on a roll.

* Typical installations reveal total cost savings of 55% or more.
